## **DETAILED ACTION**

### ***Election/Restrictions***

1. Applicant's election with traverse of Group II in Paper No. 14 is acknowledged. The traversal is on the ground(s) that different classification should be provided for the different species. This is not found persuasive because election of species does not require the showing of different classification. However, the species of Group IV has been joined with that of Group II in view of applicant's argument.

The requirement is still deemed proper and is therefore made FINAL.

### ***Priority***

2. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

### ***Drawings***

3. The drawings are objected to because the blocks in Fig. 5 are not labeled with appropriate legends. Correction is required.

### ***Claim Rejections - 35 USC § 102***

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 2633

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 8-14, 16-20, and 22-32 are rejected under 35 U.S.C. 102(b) as being anticipated by any one of Taga et al., (U.S. Patent No. 5,471,333) or Electronics Letters, Vol. 31, No. 3, pages 216-217 (cited by applicant).

Any one of Taga et al., or the Nakazawa et al., article in Electronics Letters in Fig. 1 respectively show an optical soliton communications system comprising a multiplicity of fiber lengths (5-6, L) of opposite sign dispersion and being formed as a multiplicity of unit cells. Thus, claims 8, 16, 22, and 29 are rejected.

As to claims 9-13, 17-20, 23-28, and 30-32, any one of the Taga et al., or Nakazawa et al., reference meet the subject matter of the claims (see Fig. 1 and corresponding discussion).

### ***Conclusion***

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The art of record are cited for their teachings of optical soliton transmission systems with dispersion management.
